Welcome Letter

Dear New Patient,

I'd like to take a moment to welcome you as a new patient of The Axelrad Clinic. Thank you for choosing us. We look forward to partnering with you to address your health concerns, and we will do all we can to ensure you achieve the most successful result possible for you.

The trust and confidence you have placed in me is most appreciated. As the clinic director, I see many patients which respond favorably to acupuncture care. My mission is to help you achieve your treatment goals, and to maintain optimal health over the long-term using safe, natural and holistic acupuncture, herbal therapy (when appropriate), and nutritional guidance and support.

Traditional Chinese Medicine, the ancient health care system of which acupuncture is a part, definitely works.

1. It can help prevent illness and disease
2. It activates the self-healing and self-regulating abilities of the body.
3. It adjusts and balances the flow of vital life energy, called Qi.
4. It can help you achieve optimal health, vitality, and well-being.

The precious gift of health is an investment that takes both time and money. In order to help you to get the most out of this worthwhile investment I would like to share a few suggestions:

1. **Be on time and keep your appointments.** Each treatment builds upon previous ones. It is important to follow through with your future care plan in order to receive maximum benefit.
2. **Do your homework.** In many ways what you do at home, at work and at play affects your progress. I offer suggestions and self-care techniques to support you on the road to your treatment goals toward a life of increased wellness and vitality.
3. **Give it time.** As with any medical treatment, healing with acupuncture is a process, not a magic pill. It takes time and is influenced by many factors. Over time, things should improve and if necessary, we will adjust your treatment plan as we proceed. Changes to your condition can happen faster than anticipated, so enjoy them!
4. **Keep a positive attitude and EXPECT positive results.** As we follow through on your treatment plan, look for signs of improvement and take encouragement from them. Build an attitude that **expects** positive results and **knows** that profound healing is possible. Your belief and expectation has an **incredibly** strong influence on your body, and is a key factor in healing.

It is a great pleasure to welcome you to the clinic, and I look forward to our next appointment together.

Yours in Health and Wellness,

Chris Axelrad, M.S.O.M., L. Ac., M.M.Q.

Informed Consent

I agree to receive complementary therapies from any practitioner employed at The Axelrad Clinic, which may include, but is not limited to acupuncture, ear seeds, moxibustion, herbal medicine, massage, cupping, gua sha or electrical stimulation.

Acupuncture: Insertion of fine solid needles into the body. There may be some sensation, such as, heaviness, numbness, warmth, tingling, electrical, which should not be associated with pain, and is normal. There may be some residual sensation following the removal of the needles. Although care is taken on insertion, occasionally bruising or sensitivity at the insertion point may occur and resolves within a few days. Acupuncture may induce feelings of deep relaxation, and rarely lightheadedness. If these feelings occur, inform the staff, and you can relax in our waiting area. Be sure to eat regular meals and do not have a treatment on an empty stomach.

Ear seeds: Following treatment, small seeds may be taped to specific points in the auricle of the ear. If there is any irritation, discomfort or problem simply remove and discard. Typical length of time to stay in is 1-3 days in summer and 5-7 days in winter. Remove after that length of time or earlier.

Moxibustion: The burning of the herb *Artemesa vulgaris*, may be done above the skin, on the needle or directly on my skin. With any type of heat application, including moxibustion or a heat lamp, there is always the risk of a burn, blister or small scar.

Electro-acupuncture: Use of a small, battery-powered stimulator, attached to the end of the needles. A slight vibratory sensation may be felt with the use of this technique. Conditions may be exacerbated temporarily during the healing process.

Chinese Bleeding Therapy: Lancet inserted to discharge a few drops of blood. Bruise may occur lasting a few days.

Chinese Herbal Medicine: All herbal prescriptions used in this clinic are considered safe in the practice of Chinese Medicine, however may cause unforeseen allergic reactions. It is your responsibility to discuss allergies you have (plant, animal, environment) and all medications/supplements including changes.

Gua Sha/Cupping: A Chinese massage technique that uses a gua sha spoon or suction cup with ointment to promote blood circulation. It may leave redness, bruising and tenderness on the skin for 1-7 days. It is important to stay warm and avoid a chill for 48 hours post treatment.

Medical Qi Gong: Medical Qi Gong involves the cleansing, adjustment, and supplementation of the patient's bio-energy (Qi) fields to promote healing. The patient may feel sensations such as tingling, warmth, or cold, and may also experience a sense of calm and relaxation or emotional release. In addition, colors or images may come forth in the mind's eye. Your therapist may recommend counseling by a licensed psychotherapist to assist in resolving mental/emotional issues that are discovered.

Certain types of treatment are contraindicated in pregnant women. If I become pregnant or suspect I am pregnant, I will notify staff before treatment.

You may revoke consent verbally for any of these procedures at any time.

I have read, or have had read to me, the above informed consent policy. I have had an opportunity to ask questions and by signing below I agree to the above.
